LoopForgeLab

The Economic Brain for Mechanical Product Innovation

TEAM

Expertise and Execution

Olaf Pick

20 years management consulting, bridging economic and environmental priorities

Mouaz Al Qudsi

15+ years in software, CTO in several startups, expert in AI engineering

René Reich

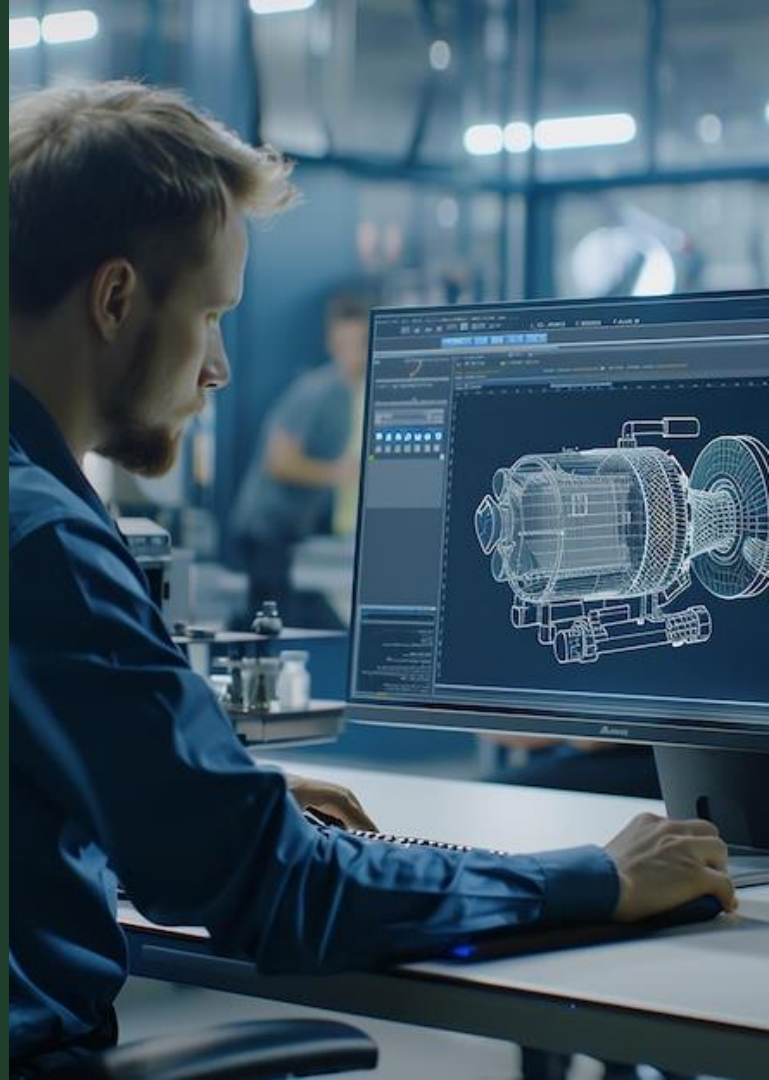
10 years in product development, MSc and PhD in AI, 2nd time founder

"Talent wins games, but teamwork and intelligence win championships." – Michael Jordan

PROBLEM

Mechanical engineers work in physical units, but the decisions are made in Euros

- 80% emissions determined in the design phase
- Engineering hours increased by 41%-194% in 20 years



SOLUTION

Engineering Data

Operational Data

Supply Chain Data

Product Intelligence Engine

RFQ	Manufacturing Cost	Criticality Analysis	Compliance & Risk	Operator and Life Cycle Costs

Competitive and Faster Product Development

COMPETITION

A landscape of 526 companies and 1,036 products

Engineering

CAD, CAE, CAM,
Autodesk, Siemens, etc.

Data & Requirements Management

Colab, Flow Engineering, etc.

LoopForgeLab

The economic integration

Sustainability

OpenLCA, Circularise, etc.

Sales & Quotes

Elfsquad, Blue Yonder, etc.

DIFFERENTATION

Extending the limits of mechanical product engineering

Real-time tradeoffs

Costs, Carbon, Compliance, Customer Value

Design Copilot

Get sustainable and economic product design suggestions

Operator Insights

Total Operator Costs, Repairability, Circular Business Models

USP

We embed Market Intelligence into internal calculations

Market and cost intelligence platform for

- innovators,
- product managers,
- technical sales and
- product engineers

to build better products and drive revenues faster.

GO-TO-MARKET

"*Vision without execution is hallucination*." – Thomas Edison

Target Market

- Packaging Machinery producers
- Material Handling Machinery producers
- Engineering Services

Ideal Customer

- OEM
- In Central Europe (DE, AT, CH, PL, CZ, NL, BE)
- More than 30 employees

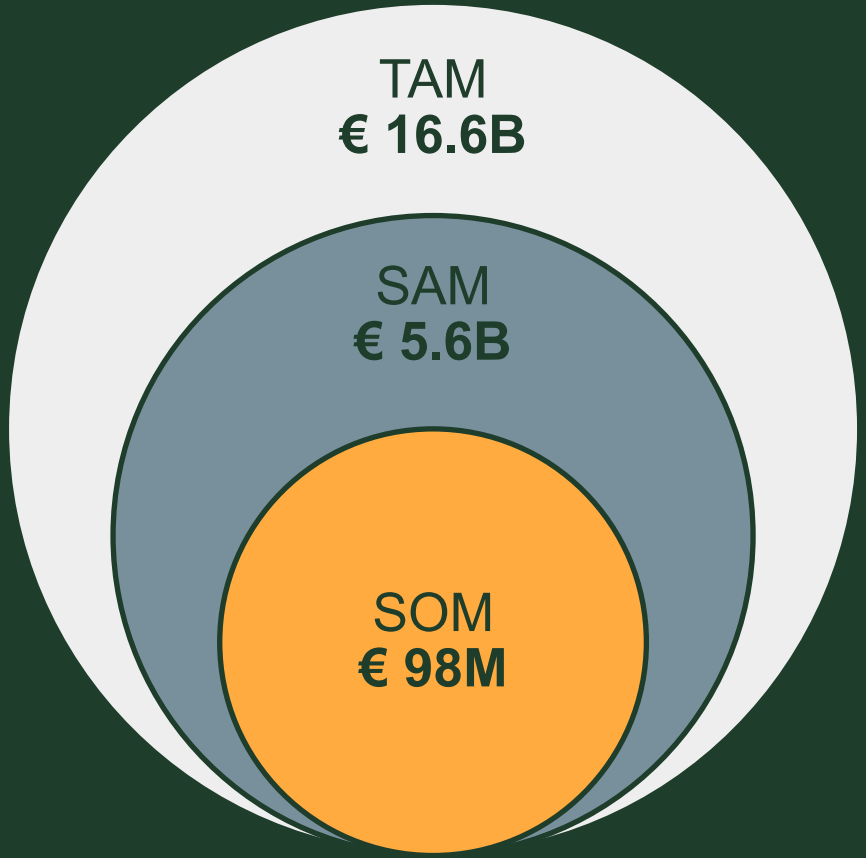
Approach

- Personal contacts and networks
- Industry Fairs
- Introductions through Angels

MARKET SIZE

Engineering software market grows by 15% CAGR

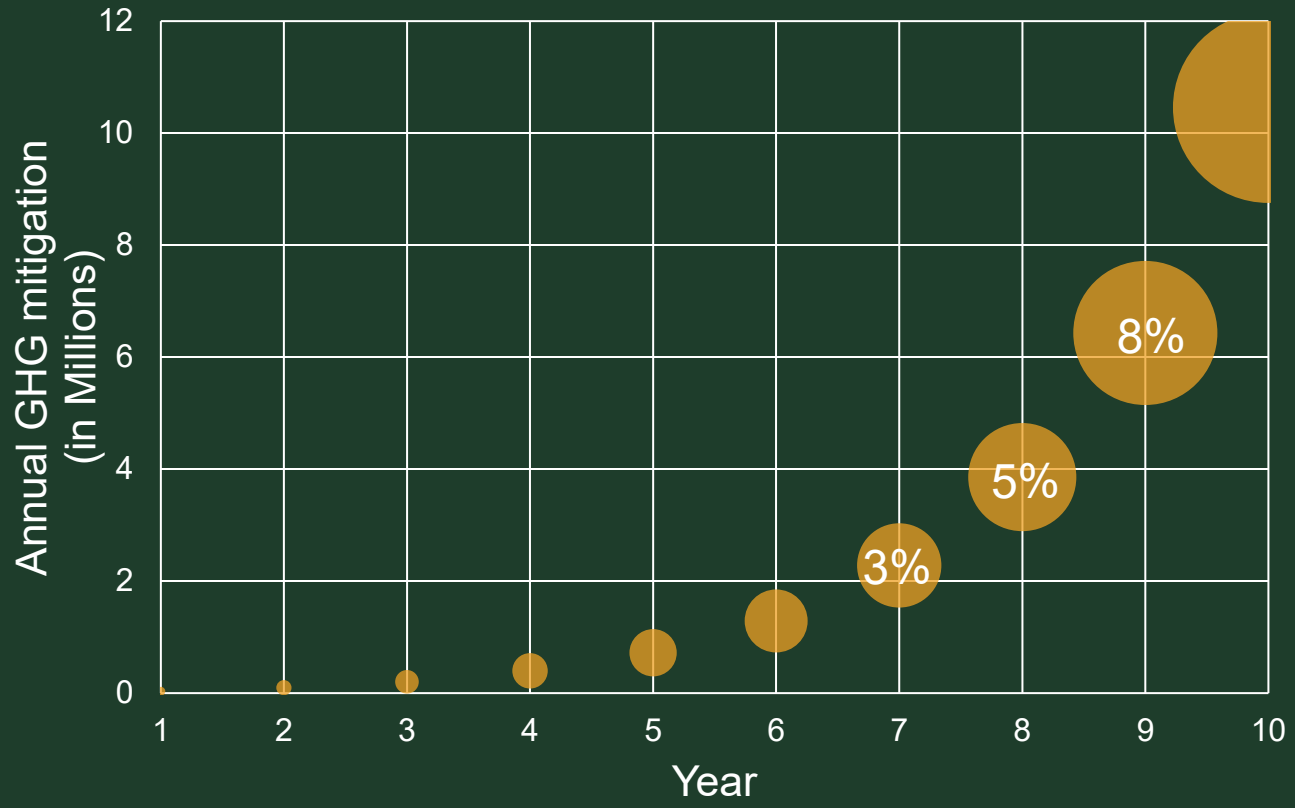
- TAM: Value created in 415,000 mechanical engineering companies
- SOM: 2,255 packaging and material handling machinery producers
- Nobody adopted AI tools in the RFQ process but 38% plan to do so within a year*



TAM, SAM, and SOM based on value-added theory and bottom-up

*Center for Automotive Research (2026)

CARBON CASE



Total SAC
99.7M tCO_2e

Year 10 SOC
10.5M tCO_2e
at 14% SAM market share

MILESTONES

The Journey toward sustainable product innovation

Q2 2026
Development of
RFQ and LCC module

Q2 2026
first customer

Q1 2027
MVP market roll out

Q2 2027
Seed round

Q4 2027
Horizontal
expansion

Q2 2028
Series A round

Q1 2029
50th customer

VISION

We will be the standard software for modern product development.

Our Vision is clear: Make sustainability and business viability native at concept stage.

"The best way to predict the future is to invent it." – Alan Kay

You can enable it today
